

## Current status "Hygiene concept for trade fairs"

Dear exhibitors and visitors,

The "hygienic" framework conditions and specifications in general, and for trade fairs, are currently in a very dynamic phase.

For this reason, it is difficult to make binding and conclusive statements about the hygiene concept for trade fairs in 2021 at this stage.

Please note that the illustrated information on this sheet will continue to be the basic pillars of our hygiene protection concept. Based on current developments, it appears that these core statements will continue to be valid.

In addition, we assume that the "3G" model, as is already the case in other industries, will be decisive for attendance at the trade show:

**"Geimpft" (Vaccinated)** is defined as having received the last vaccine dose (as prescribed by the STIKO) of a vaccine licensed in the European Union more than 14 days ago.

**"Genesen" (Recovered)** is considered who can prove a positive PCR test at least 28 days and not more than six months old.

**"Getestet" (Tested)** is considered who can show a negative test result (rapid test or PCR test), according to the then valid specifications.

Solutions for corresponding proofs/certificates are offered as part of our digital ticketing concept.

You can be assured that we are in constant exchange with the authorities and will inform you as soon as concrete specifications are determined.

Yours sincerely

Your Event Technology & Exhibition Services Team
